

Initial Build Meeting Notes

Homepage

Overall, the design is still very good. The homepage icon is nice, so I think now we won't necessarily need the "Home" section in the navbar. Also just a few more visual changes I think that should be made:

- Include a main title for the first intro banner (planet Earth image)
- Center the "Types of Communications" banner, or provide some consistency on the headings layout. I think the header title and "more info" buttons being separated also looks nice too.
- Include a short blurb about each category for the banners, maybe right above the "more info" buttons or under the headings

Inner Pages

I really like the second version of the inner pages where we essentially have a mini navbar for each category. A minor bit of tweaks:

- Closer letter spacing
- Larger margins for text
