

## **Spacecraft Comms Project Notes**

Director: Brendan Yang

Designer: Sharyliz Reid

Objective: Provide an informational, yet modern and futuristic presentation of the communications technologies used in spacecraft

### *Themes:*

- Outer space
- Dark colors with bright, vibrant colors (i.e. galaxies, planetary bodies, star systems, etc.)
- Informational (semi-technical decorative photos like schematics or technology themed backgrounds)

### *Fonts:*

- Minimalistic, futuristic, and sleek
- Sharp, bold fonts for headings
- Easily readable fonts for content, probably no serif fonts though

### Main Page Layout:

- \* Landing banner with wide background image and sharp, bold text
- \* Following pages are overview sections with image backgrounds/solid colors that give brief description about the topic they introduce (i.e. wide banners like Apple website)

### Secondary Info Page Layout:

- \* Wide photograph banner at top with same bold introductory text on topic
- \* Short paragraphs below describing topic
- \* Photos layout break text in middle or alternate on left and right sides
